

Allied Electric Sparks Success!!!!

Allied Electric Company, Inc was established in 1959 and for over 60 years has provided various commercial and industrial electrical services. Allied Electric is currently seeking skilled and dedicated Electrician to join our dynamic team.

The ideal candidate will possess a strong background in electrical work, with experience in both commercial and industrial settings. This role involves working in various environments, performing installations, renovations, and maintenance of electrical systems while adhering to safety standards and the National Electrical Code (NEC). Candidates must be able to work in a fast-paced environment, possessing excellent time-management skills and be willing to work overtime as needed.

Requirements and Responsibilities include (but not limited to):

- Troubleshoot and repair electrical and mechanical systems using tools such as voltmeters and other diagnostic equipment.
- Install electronic control panels and related mechanical or electrical equipment
- Perform scheduled and unscheduled electrical maintenance and/or repairs to equipment/machinery
- Install, remodel and/or upgrade equipment/machinery
- Ability to read and interpret blueprints, technical diagrams and follow wiring schematics to properly install equipment.
- Ability to inspect and replace faulty wires, electrical systems or components to determine condition and identify needed repairs.
- Ability to work independently as well as collaborate effectively within a team.
- Proficient in the use of electrical tools, equipment, and testing devices.
- Proficient in conduit bends of various types and sizes.
- Ability to lift heavy objects and work in various environments (e.g. heights, tight spaces)
- Ability to work independently and as a part of a team.
- Maintain a clean and organized work environment, ensuring all tools and materials are properly stored after use.
- Valid driver's license and be insurable under Allied Electric's automobile insurance policy.
- Understanding of OSHA regulations and safety standards

Experience:

- Proven experience as an electrician in both commercial and industrial environments.
- Strong knowledge of electrical systems, wiring techniques and safety protocols/practices.
- Knowledge of high voltage systems and their installation/maintenance requirements.
- Strong problem-solving skills with a focus on safety and quality workmanship.
- Excellent leadership skills with the ability to motivate and manage a team.
- Possess journeyman certificate, state certificate, or a degree in the electrical field with experience repairing and troubleshooting electrical systems,

Benefits: Competitive hourly wage, health, dental and vision insurance, retirement plan with company match, paid time off, and discretionary bonus.
