

## **Job Description**

We are currently in need of a Journeyman Electrician that has the ability to install, troubleshoot and repair electrical and mechanical controls and devices on a wide variety of manufacturing equipment, shears, presses, PLC's and other related machinery. Proficiency in reading and interpreting drawings, blueprints and schematics required. Must be able to work independently and willingness to work overtime when needed.

### **Minimum Qualifications:**

- Experience troubleshooting 480 motors, limit switches, and sensors with 110 AC / 24 DC volts.
- Ability to troubleshoot and repair by using test instruments, schematics or ladder logic.
- Thorough working knowledge of lock/out tag/out and arc flash.
- Able to bend conduit with minimal assistance.
- Experience with RS Logix/Allen Bradley PLC's is a plus.
- Experience with ABB/Motoman/Fanuc controls and robots preferred.
- Basic computer skills.
